

QL-300

Year-End Bundle

Vibrant, durable labels are within reach, for less! For a limited time, the QL-300, the world's first CMYK + White toner-based tabletop label printer, is available at a discounted rate with AstroNova's Year-End Bundle offer. With the QL-300, advanced label designs are brought to life. Print on transparent and colored substrates, achieve color gradations including white, or apply spot UV sheen or a varnished appearance on any label. Set your brand apart with vibrant, impactful product labels.

Key features of the QL-300 include:

- Five-Color (CMYK + W) or Four-Color (CMYK) capability allow you to disable white toner when not required
- Economical toner cartridge replacements and consumables deliver stunning labels at a low total cost of ownership
- Intuitive user interface manages label printing, printer, and supplies status
- Optimized media path combined with integral automatic cutter for print jobs of any size without label waste

Printers are ready to ship. Labels are made to order, but we have popular sizes and shapes in stock!

Do not miss this limited-time opportunity! Bring your labels to life, today. We don't discount very often. Contact **Dennis Kallaher** today to see if this is right for you.
